Characteristics of ENERGY STAR Qualified Windows, Doors and Skylights in the Northern Climate Zone

The ENERGY STAR Northern Climate Zone Map

Windows and Doors that are ENERGY STAR qualified in the Northern Climate Zone must have [NFRC](#) certified performance ratings of:

- [U-Factor: 0.35 or less](#)
- [Solar Heat Gain Coefficient \(SHGC\): Any](#)

Skylights that are ENERGY STAR qualified in the Northern Climate Zone must have [NFRC](#) certified performance ratings of:

- [U-Factor: 0.60 \(NFRC 2001\) or less*: 0.45 \(RES97\) or less**](#)
- [Solar Heat Gain Coefficient \(SHGC\): Any](#)

*NFRC2001 procedures, fully adopted in April 2004, rate skylights at a 20 degree angle.

**NFRC1997 procedures rated skylights of residential and non-residential sizes at a 90 degree angle. Residential 1997 (RES97) ratings may be in use until March 31, 2008. NFRC labels for these products will state: 'RES97 rated at 90 degrees'.

If you want ENERGY STAR Windows, Doors and Skylights, ask for ENERGY STAR qualified in the Northern Climate Zone!

To be eligible for the PUD Energy Star Window and Door Rebate:

**** Applicants must be an active year round residential customer with the Pascoag Utility District.***

****The windows and doors must be ENERGY STAR qualified for the northern area.***
